

DocStar Upgrades to TurnKey Internet Data Center

Category: [News](#),

Posted By: [DocStar](#)

Cloud services increase bandwidth, server performance and security.

DocStar, an award-winning [document management software](#) company and a subsidiary of Astria Solutions Group, LLC, has selected IT solutions provider **TurnKey Internet** as its official provider of data center services. Located just 12 miles from DocStar's Schenectady headquarters, the 12,000-square-foot state-of-the-art hosting facility features an array of technologies to ensure data access, performance and security.

"The cloud powers our software and our business," says Greg Laird, DocStar's VP of Product Development. "Our growth required a bigger, faster, stronger cloud in order to continue to provide the highest level of service. The TurnKey data center exceeds all of our requirements so our customers can continue to grow."

"Data center best practices like redundancy in both power supply and high-speed network connections were essential features. The SSAE 16 Certification puts this facility into an elite class above the old SAS 70 Type II standard," continued Laird. "Plus we love that we can support another local business."

In addition to increased security and performance, TurnKey's facility boasts "green" technology that makes it among the most energy-efficient world-wide.

"Of paramount importance is our ability to deliver speed and reliability," said Adam Wills, TurnKey Internet CEO. "We also take pride in our innovative green technologies that have not only helped us become more environmentally responsible, but also placed us on the cutting edge as a cloud services provider offering low-cost, energy-efficient IT services and solutions."

Small Business Excellence

The DocStar and TurnKey relationship began in May 2012 when the New York Business Development Corporation (NYBDC) honored both companies with a Small Business Excellence Award.

“NYBDC is aggressively seeking to approve loans to small businesses, including those in emerging technologies, to help generate economic development and new jobs,” said Jim Conroy, NYBDC Senior Vice President. “NYBDC has over \$1.2 billion in managed assets and often partners with banks and economic development agencies to find a way to say, ‘yes’ to an entrepreneur’s loan request. We are proud that 2 local companies have not only benefitted from our financing but are finding collaborative opportunities to help each other prosper.”

About DocStar

Founded in 1994, DocStar®, a division of Astria Solutions Group, LLC, is an innovative software company that provides collaborative document management solutions to streamline business processes for organizations of any size.
