TurnKey Internet, Inc. introduces their Partner Reseller Program with the TurnKey Desk 2.0

LATHAM, NEW YORK (September 30, 2013) – Sustainable IT solutions provider TurnKey Internet, Inc. announced today the launch of their TurnKey Desk Partner Program. As an independent partner of TurnKey Internet, reseller clients are able to earn commission off supporting the setup and sales of the brand new TurnKey Desk Virtual Office Network. The "TurnKey Desk 2.0" allows users to easily access what traditionally would be their desktop, now on a smartphone, tablet, or thin client.

"Our intention is to setup a network of independent partner reseller clients throughout the US that are equipped with the tools and knowledge they need to promote and sell the Turnkey Desk 2.0." Tim Kirsch, Executive Vice President at TurnKey Internet stated, "We have already had some great success with this program with the limited exposure we have promoted thus far. Now that the major upgrades with the Turnkey Desk 2.0 are in place, we feel we are ready to expand our efforts utilizing a network of localized resellers."

The TurnKey Desk can be used for companies in which hundreds of employees are able to share files and documents with each other, be it down the hall, across the country or around the globe. Files can be accessed, shared and stored securely to help make sharing documents easier and more efficient. The TurnKey Desk can be preloaded with applications useful for both individuals and businesses. Such applications include Microsoft Office and the Adobe Creative Suite, as well as any customizable business applications needed.

"One of the reasons why the virtual desktop market is expanding is because of their ability to replace aging office Desktop PC networks and save companies money," CEO, Adam Wills said. "For example thin clients cost far less than PC's with less moving parts and need for maintenance. Since thin clients are only being used to access the virtual desktops, there are almost no IT related costs for companies once it is setup."
